

AERO PRESSURE SENSORS

The Techmor AP-1 allows users to take differential pressures from up to 16 different locations simultaneously in one box. Valuable in the wind tunnel, for straightline testing, and on the track, the AP-1 can be networked with other AP-1 boxes to provide more pressure inputs. Available with CAN or analog output, the AP-1 can be set up to work with your existing system.

Features

6-30V DC Power

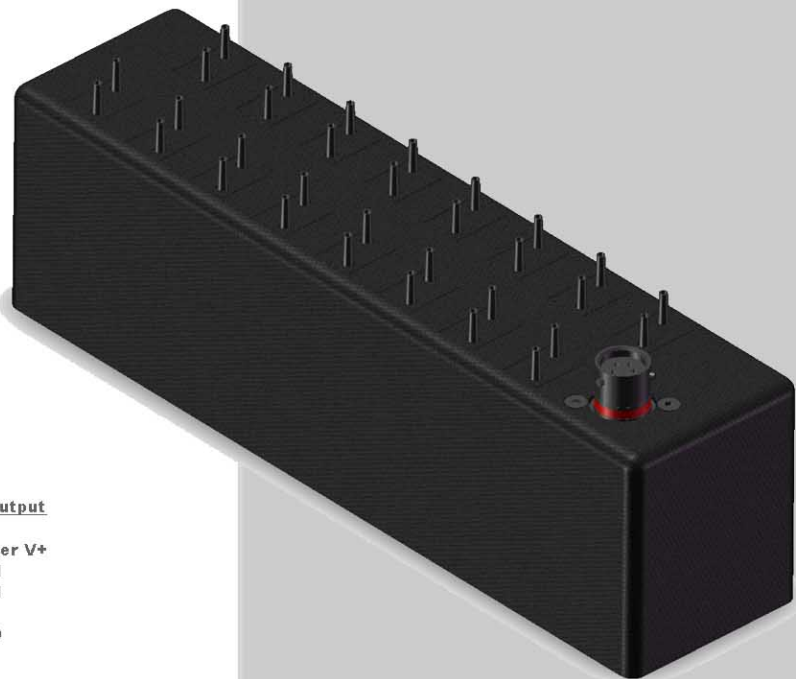

0-5V Analog Output

+/- 1psi measurement

Deutsch Autosport Connectors

Analog, CAN Bus, or Wireless output

AP-1

CAN Output

1. Power V+
2. CAN
3. CAN
4. NC
5. GND

Ordering Info:

AP-1-_____

(ex. AP-1-A)
A=Analog w/ 22-pin out,
C= CAN with 5-pin

Standard models:

AP-1 - A
AP-1 - C

Rev B 7-25-08
